PROFILE

Product Designer with professional front-end experience. I design interfaces that developers can actually build, because I used to be the one building them: I think in components, design for every screen size from the start, and hand off specs that don't need a second round of questions. I combine research, information architecture, prototyping, usability testing, UX writing and UI design with the technical judgment of having shipped production code.

SKILLS

UX/UI Design	User Flows Information Architecture Wireframes Interaction Design Responsive UI
Prototyping	Figma Interactive Prototypes High-Fidelity UI Auto Layout
Design Systems	Component Libraries Reusable UI Visual Hierarchy Accessibility
Research & Testing	User Research Benchmarking Heuristic Evaluation Usability Testing
Content & Delivery	UX Writing Microcopy Product Storytelling Design Handoff UI Specifications
Frontend & Tools	HTML CSS JavaScript React Next.js Vite FigJam Miro Git GitHub

WORK EXPERIENCE

Jun 2026 - Present	UX Designer, Savergy - Designed and built Savergy's production landing page end to end: from Figma prototype to a scroll-driven site in React + Vite. - Design responsive UX/UI for Savergy's digital energy product, focusing on clarity, accessibility, and conversion. - Improve key user flows and design patterns, reducing inconsistencies and supporting a more cohesive product experience. - Built reusable UI components and guidelines in Figma, speeding up design and iteration on new screens by approximately 20%.
Jan 2023 - Jun 2024	Frontend Developer, Ingerba - Implemented responsive user interfaces from UX/UI designs using HTML, CSS, JavaScript, React, and Next.js, working directly with the design team. - Translated wireframes and prototypes into reusable interfaces across desktop and mobile, making repeated front-end implementation approximately 20% faster.
Jun 2022 - Dec 2022	Frontend Developer, ID for Ideas - Built responsive web interfaces and reusable components using HTML, CSS, JavaScript, React, and Next.js. - Translated UX/UI designs into interfaces that worked consistently across desktop and mobile, reducing repeated layout work.

SELECTED PORTFOLIO PROJECTS

NINO - B2B Container Rental Management

Design prototype for a family-owned container rental business (14 containers, 2 trucks). Mapped the real operation and designed rentals, logistics and payments as one connected workflow, with user flows and interactive Figma screens.

FRAMEO - Streaming Recommendation App

AI-powered concept for deciding what to watch based on mood, time and platforms. Research, card sorting, information architecture, UI kit, high-fidelity screens and usability testing; Figma prototype and live demo.

VELORA - Hotel Website UX Audit

UX audit and redesign proposal for a boutique hotel's booking journey: heuristic review, benchmark, guest archetypes, journey mapping and prioritized fixes.

ONETAP - Personal Finance App

End-to-end mobile design for income, expenses and monthly balance: research, flows, wireframes, prototyping, usability testing, UX writing and UI design.

EDUCATION

Coderhouse - UX/UI Design
UTN - Full Stack Web Development
UTN - HTML5 & CSS3
Udemy - Professional JavaScript
